

Practice (6.2A)

1. a) Graph the ordered pairs in the table of values.

| | | | | | | |
|----------|---|---|----|----|----|----|
| x | 0 | 1 | 2 | 3 | 4 | 5 |
| y | 0 | 5 | 10 | 15 | 20 | 25 |

b) What is the difference in value for consecutive x-values? What is the difference in value for consecutive y-values?

x-values: 1

$5-4=1$, $4-3=1$, etc.

y-values: 5

$25-20=5$, $20-15=5$, etc.

c) What is an expression for y in terms of x?

$$y = 5x$$

2. For each table of values, tell whether the relationship is linear. Explain how you know.

a)

| | | | | | |
|----------|---|---|----|----|----|
| s | 2 | 3 | 4 | 5 | 6 |
| t | 5 | 9 | 15 | 19 | 25 |

$+1$ $+1$ $+1$ $+1$
 $+4$ $+6$ $+5$ $+6$

No. The change in y compared to the change in x is not constant.

b)

| | <i>h</i> | <i>i</i> |
|----|----------|----------|
| -3 | 7 | -6 |
| -3 | 4 | -3 |
| | 1 | 0 |

Yes. The change in y is constant
change in x

$$\frac{3}{-3} = \textcircled{-1} \quad \frac{3}{-3} = \textcircled{-1}$$

SAME

3. For the following table of values, graph the ordered pairs. Does the relationship appear to be linear? Explain.

| | | | | |
|----------|---|---|----|----|
| <i>u</i> | 0 | 2 | 3 | 6 |
| <i>v</i> | 3 | 9 | 12 | 21 |

Yes. The points are on the same line

Also, change in y is constant.
change in x

$$\frac{6}{2} = \frac{3}{1} = \frac{9}{3} = \textcircled{3}$$

4. Mahesha has \$100 altogether, in \$10 bills and \$5 bills.

a) Fill in the table of values to show at least five possible combinations of \$10 bills and \$5 bills that Mahesha may have. Add columns to the table if necessary.

| | | | | | |
|--------------------------------------|----|----|----|----|----|
| Number of \$10 Bills <i>t</i> | 0 | 1 | 2 | 3 | 4 |
| Number of \$5 Bills <i>f</i> | 20 | 18 | 16 | 14 | 12 |

b) Draw a graph of the data. Does the relationship appear linear? Explain.

Yes. The points appear to be on a straight line

c) Is it possible for Mahesha to have 19 \$5 bills? Explain.

No. Having 19 \$5 bills would require having $\frac{1}{2}$ of a \$10 bill. This is impossible
